

## Machaon's New York-Approved Test List

*New York patients now have access to the fastest testing in the US from Machaon.*

### **NY-Approved Lab Developed Tests (LTDs)**

- ADAMTS13 Activity (<24-hour STAT TAT, 7-days a week)
- ADAMTS13 Inhibitor (<24-hour STAT TAT, 7-days a week)
- ADAMTS13 Antibody (<24-hour STAT TAT, 7-days a week)
- aHUS Genetic Panel 3.0 (<48-hour STAT TAT, M-F)
- TMA-Complete Genetic Panel 3.0 (<48-hour STAT TAT, M-F)
- ADAMTS13 Gene Sequencing (<48-hour STAT TAT, M-F)
- CFH Autoantibodies (<24-hour STAT TAT, M-F)
- CXCL9 Level (<24-hour STAT TAT, M-F)
- Soluble IL-2RA (CD25) Level

### **NY-Approved and FDA-Approved Tests**

- Anticardiolipin Antibody (IgG, IgM, IgA)
- Antithrombin III Activity
- aPTT (factor sensitive reagent, lupus sensitive reagent and associated mixing studies)
- Beta-2 Glycoprotein I Antibody (IgG, IgM, IgA)
- Factor Activity Levels and Inhibitor Titers (8, 9, 11, 12, 2, 5, 7, 10)
- Fibrinogen Activity
- Heparin Antibody- ELISA
- Protein C Activity
- Protein S Activity
- Ristocetin Cofactor Activity (Von Willebrand Factor Activity)
- Russell Viper Venom Time (dilute)
- Thrombin Time
- Von Willebrand Factor Antigen

### **Tests Needing a NY Restricted Laboratory Permit Prior to Testing**

- mHam 2.0 – Complement-dependent Cell Killing Assay
- HLH Genetic Panel 3.0 (<48-hour STAT TAT, M-F)
- C3 Glomerulopathy Genetic Panel (<48-hour STAT TAT, M-F)
- All other tests on our menu
